The Maharashtra State Board of Technical Education has adopted the policy of designing the curriculum based on scientific principles since 1995.

- As a part of curriculum implementation, the student assessment norms have been implemented.
- The curriculum mainly focuses on professional and generic skill development in students and meeting the desired quality of teaching, learning and management. This needs redesign of whole education process and to plan activities at various levels

such as institution, department, and teacher level on regular basis.

- The Heads of Institutions are required to perform various functions to manage the change along with their routine activities.
- The Curriculum Implementation and Assessment Norms (CIAAN) are prepared for ensuring the effective curriculum implementation.
- The norms are focused on the progressive assessment of the student. However, this also provides feedback at regular intervals to the teachers.
- This will also be helpful to the institutions to manage the resources effectively and efficiently.
- It is expected that this will bring uniformity in the curriculum implementation and student assessment to meet the objectives.

Approach for Curriculum Implementation

MSBTE has designed its curriculum by adopting Systems Approach. The same approach has been considered while considering Curriculum Implementation. The salient features from the diagram are as follows. The customer of the system is industry and community that requires competent technical manpower. To produce the desired output, curriculum implementation process should be well planned and executed. The diagram shows sequential learning process, from state level planning to students' meaningful learning. To carry out the educational processes, the enabling processes have been identified as shown in the diagram. To ensure effective curriculum implementation, the management structure has been proposed under the control of MSBTE such as RBTE, RCC, ICIU, EAMC and IAMC. The mechanism proposed will ensure the quality of the processes. This will be achieved through the monitoring carried out by EAMC and IAMC. The diagram shows the output of this process. To ensure improvement in Teaching - learning process and quality of output, the systems approach is most appropriate.
